Patent Application

License to the Government (by Government Employee - Employee to File Patent Application)

INVENTION TITLE:

INVENTOR(S):

NASA Case No.:

WHEREAS, the parties to this License are the undersigned inventor(s) and the United States Government (hereafter Government), as represented by the Administrator of the National Aeronautics and Space Administration; and

WHEREAS, the invention identified above was made while the inventor(s) was a (were) Government employee(s) as defined in 37 CFR 501.3(c); and

WHEREAS, pursuant to 37 CFR 501.6(a)(2) and Executive Order 10096, it has been determined that the contribution of the Government is insufficient equitably to justify a requirement of assignment to the Government of the entire right, title, and interest in the invention or the Government has insufficient interest in the invention to obtain the entire right, title, and interest therein (although the Government could obtain same under 37 CFR 501.6(a)(1)); and

WHEREAS, the Administrator has determined that the entire right, title, and interest in the invention is left to the inventor(s), subject to the reservation of the License set forth below.

NOW THEREFORE, pursuant to 37 CFR 501.6(a)(2), and Executive Order 10096, the undersigned inventor(s) hereby grant(s) to the Government a nonexclusive, irrevocable, royalty-free license in the invention and any patent which may issue thereon, including any continuations, divisional, continuation-in-part, or reissue patents, with power to grant licenses for all Governmental purposes.

The inventor(s) also agree(s) to include within the specification of any patent application and any patent, domestic or foreign, issuing thereon covering this invention the following statement: "The invention described herein was made by employees of the United States Government and may be manufactured and used by or for the Government of the United States of America for governmental purposes without the payment of any royalties thereon or therefor."
